Art Unit: 2862

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Species of figure 1;
2. Species of figure 6;
3. Species of figures 11-14;
4. Species of figure 17;
5. Species of figures 20-21;
6. Species of figures 22-23;
7. Species of figure 24;
8. Species of figure 25;
9. Species of figure 29;
10. Species of figures 30-31;

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. **The reply must also identify the claims readable on the elected species**, including any claims subsequently added. An argument that a claim is

Art Unit: 2862

allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The search required for one species does not require for other species; the technical features or structure of one species is different than that of other species and they do not form a single general inventive concept.

5. The following claim(s) are generic: Currently, no appears to be generic.

6. A telephone call was made to Mr. Lawrence E. Ashery on October 28, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
